

PRESS RELEASE

Victor Guerin brings his commissioned artwork, **Loud Speaker, a sensory installation shaped by wildfire research and ecological instability, to Art for Guernsey.**

Following its first presentation at ArtHouse Jersey from 20 March to 3 May 2026, *Loud Speaker* will be exhibited at Art for Guernsey from **10 September to 12 November 2026**. The work centres on a partially burnt Monterey cypress driftwood trunk suspended diagonally within the gallery, as though caught within the architecture in the midst of a fall. A second severed section stands on the floor at an opposing angle, creating a charged spatial interval between the two forms.

Three metres tall, the installation holds collapse in suspension. Fire-scarred surfaces sit alongside areas worn smooth by water and time, compressing multiple environmental forces into a single material body. The scent of pine tar extends the work into the air, introducing a sensory register of preservation, combustion and repair.

An accompanying audio verse activates the installation through sound. Sculpture, scent and sound are brought into a single environment in which ecological damage is experienced as ongoing, unstable and unresolved.

“Loud Speaker demonstrates exactly the kind of ambitious contemporary practice ArtHouse Jersey seeks to champion. Victor Guerin has created a work of striking spatial presence and unusual sensitivity, one that holds fragility, violence and endurance in the same field. The result is an installation that feels urgent without becoming didactic, and memorable without ever simplifying its subject.”

– Tom Dingle, CEO, ArtHouse Jersey

“Loud Speaker began with the image of a tree held in a state of unfinished falling. I wanted the work to carry fire, water, time and human intervention within the same body, so that it would feel like something still under pressure. The audio verse draws on scientific research and reports of wildfires around the world. Some visitors will recognise certain events and not others, and that matters: the work moves between what is familiar and what remains unknown, creating a sense of the scale and urgency of a crisis unfolding across many places at once. With the scent of pine tar, suggesting both burning and preservation, the installation becomes an environment in which damage is still unfolding around us.”

– Victor Guerin

Artist bio

Victor Guerin (b. 1993) is a French-British artist and engineer working across sculpture, installation and painting. He holds an MA in Sculpture from the Royal College of Art (2024) and an MEng from Arts et Métiers ParisTech (2016). His practice examines how human intervention reshapes ecosystems, bringing scientific training and material research into dialogue with contemporary ecological questions through form, structure and process.

In 2025, Guerin received an institutional commission from neimënster in Luxembourg and was made an ArtLoft fellow. He was a finalist for the Hyundai Award for Excellence in Sustainability and Creative Practice in 2024 and received the Averil Picot Art Award in 2023. His work has been exhibited at Saatchi Gallery, the Royal Scottish Academy, Dalkeith Palace and the New Zealand Academy of Fine Arts, and is held in public collections in China and private collections in the UK, Canada and France.

A video of the work is available at victorguerin.com/loudspeaker.
